UPGRADE AND SAVE WITH PROPANE

Propane FEED Program Overview

The Propane Education & Research Council (PERC) is seeking a limited number of agricultural producers to help the propane industry demonstrate propane equipment in geographically diverse regions of the country. The goal of the Propane FEED program is to introduce new propane-fueled equipment to the agriculture industry while collecting valuable feedback on the performance of that equipment in real-world settings.

PERC Will Provide

A financial incentive to a limited number of producers who partner with PERC and purchase a new piece of propane equipment. The incentive will be paid directly to agricultural producers after they have purchased and taken possession of the equipment.

Eligible Equipment

Equipment	Incentive Level
Irrigation Engine	\$1,500 – 4 cylinders
	\$2,000 – 6 cylinders
	\$2,500 – 8 to 10 cylinders
Mower	\$2,500
Tankless Water Heater	\$1,000*

*A minimum of 2 units must be installed.

The Agricultural Producer Will Provide

- Proof of purchase and the required paperwork.
- Quarterly updates on the use of the equipment.
- Data regarding product performance to PERC and its representatives.
- Access to the farm for photos of the equipment (if requested).

Eligibility Requirements for Incentive Payment

- Participant must be a U.S. agricultural producer.
- Equipment must be used on a U.S. farm as defined by the United States Department of Agriculture.
- Participant must be a propane customer in good standing with his or her fuel supplier.
